

User Session Activity [Twitter SQL Interview Question]

Assume you are given the table containing Twitter user session activities.

Write a query that ranks users according to their total session durations (in minutes) in descending order for each session type between the start date (2022-01-01) and the end date (2022-02-01).

Output the user ID, session type, and the ranking of the total session duration.

sessions Table:

Column Name	Type
session_id	integer
user_id	integer
session_type	string ("like", "reply", "retweet")
duration	integer (in minutes)
start_date	timestamp
